

U. S. DEPARTMENT OF AGRICULTURE, BUREAU OF ANIMAL INDUSTRY.

A. D. MELVIN, CHIEF OF BUREAU.

Issued January 26, 1916.

SERVICE AND REGULATORY ANNOUNCEMENTS.

DECEMBER, 1915.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

LICENSE REVOKED.

License No. 51, held by the Union Serum Co., Chicago and Chambers Streets, Sioux City, Iowa, for the manufacture of antihog-cholera serum and hog-cholera virus was revoked December 21, 1915.

PRESERVATION OF SERUM TEST SAMPLES.

Under authority contained in regulation 22, amendment 1 to B. A. I. Order 196, inspectors in charge of virus, serum, and toxin work, are directed to see that all anti-hog-cholera serum which has been prepared for testing or treatment is collected in batches of not more than 100,000 c. c. and thoroughly mixed in a single container. After mixing, representative samples consisting of three bottles containing at least 250 c. c. each to be known as the "serum test samples," shall be collected and marked with identifying marks by a bureau employee.

If the serum is released one of the three test samples of serum shall be held under bureau lock for at least six months after the latest return date shown on the trade labels affixed to the immediate or true containers of the serum corresponding to the test samples.

SPECIMENS OF TICKS TO BE KEPT IN CERTAIN CASES.

When cattle shipped as noninfected from the area quarantined for Texas fever, or cattle from the free area are found to be infected with Texas-fever ticks, specimens of the ticks shall be retained for at least one year by the inspector in charge; and if there is any doubt about the identification of the ticks, specimens shall be promptly forwarded to the bureau for examination. Ticks may be preserved in the following fluid: Formalin 2 to 5 parts, water 100 parts.

In the case of Thomas B. Reed Peters and J. D. Thrower, charged with violating the law by the interstate shipment of anti-hog-cholera serum which was not prepared in an establishment holding an unsuspended and unrevoked license, the defendants entered a plea of *nolo contendere* and were each fined \$25 and costs.

CORRESPONDENCE WITH REPRESENTATIVES OF FOREIGN COUNTRIES.

Paragraph 103 of the Administrative Regulations of this department provides, in part, as follows:

All official communications with diplomatic and consular officers in the United States and in foreign countries must be through the Secretary of State.

It is important, particularly at the present time, that this regulation be strictly observed and that it be broadened to include all representatives of foreign governments. With this in view, the regulation is amended to read:

All official communications with diplomatic and consular officers *and other representatives of foreign governments* in the United States and in foreign countries must be through the Secretary of State.

The effect of this amendment is that no correspondence whatever is to be had with any representative of a foreign government except through the Department of State.

Any correspondence that employees of this bureau may receive from representatives of foreign countries should not be answered by them but should be forwarded to the Chief of the Bureau, with any information they may possess bearing on the subject matter of the correspondence. In case bureau employees desire information from representatives of foreign countries the matter should be referred to the Washington office.

FEBRUARY PAY ROLLS.

Pay rolls and salary vouchers for the month of February, 1916, should be submitted at the close of February 23, 1916.

Salary for February, 1916, should be computed in accordance with the following instructions:

An employee who works on the 29th of February, or is on annual or sick leave in a pay status on that date, shall be paid two-thirtieths of his monthly installment therefor. Conversely, an employee who is absent from duty in a nonpay status on February 29 shall have two-thirtieths of his monthly installment deducted therefor.

Examples: An employee entering the service and working on February 29 is entitled to two-thirtieths of his monthly installment of salary; entering the service on February 10 and working full time to and including the 29th he is entitled to twenty-one thirtieths of his monthly installment; working from February 1 to 28, inclusive, and absent without pay on the 29th he is entitled only to twenty-eight thirtieths of his installment; working every day in the month, excepting, say, February 1 and 8, he is entitled to twenty-eight thirtieths of his monthly installment.

ANNUAL LEAVE.

Beginning January 1, 1916, an employee of the bureau may not go on annual leave or leave without pay from any point other than his official station, unless previously authorized by the Washington office.

Applications for such leave, approved by the proper supervising official, must be forwarded to Washington in good time with full reasons why it is desired to begin leave at points other than official stations.

This rule will not apply to employees in the course of transfer from one official station to another who have received permission from their supervising officials to stop over at points en route at their own expense for a short period of leave.

OATHS OF OFFICE OF TEMPORARY FIELD EMPLOYEES.

Memorandum No. 154 of the Office of the Secretary, under date of December 28, 1915, amends paragraph 2 of the Administrative Regulations to read as follows:

2. *Oath of office.*—In all cases of original appointment, promotion, demotion, or transfer from one position to another, on the statutory roll, or of original appointment on a lump-fund roll, or of a transfer from the statutory roll of one bureau to the lump-fund roll of another bureau, an oath of office must be executed and filed with the latter bureau before any payment of salary under the new appointment will be made. An employee performing continuous service in the same bureau will not be required to take an additional oath of office in case of his promotion, demotion, transfer from one lump-fund roll to another, transfer from statutory to a lump-fund roll, or reassignment or other change of status on a lump-fund roll.

Oaths of office, when required, must be taken without expense to the United States. They may be taken before any officer having an official seal, with authority to administer oaths either under United States statutes or local municipal law, and must be properly certified under the hand and seal of such officer. Oaths of office may also be taken before the chief clerk of the department or the chief clerk of any bureau or statutory division thereof in Washington, D. C., provided the chief clerk be one who occupies a statutory position.

Forest guards and other field employees engaged for temporary or occasional service, receiving compensation from lump-fund appropriations are authorized to subscribe to the oath of office before a forest ranger or other commissioned employee of the Department. Oaths of office, or declarations, and statement sheets of such employees shall be forwarded to the appointment clerk of the department as soon as possible after execution.

PUBLICATIONS IN DECEMBER.

[The bureau keeps no mailing list for sending publication to individual employees, but publications are sent in bulk to inspectors in charge for distribution to members of their forces. The number of copies varies with the subject or nature of the publication and the number and class of employees. For example, in the case of a publication on a veterinary subject, sufficient copies are sent for the veterinarians. Inspectors in charge will use their judgment and distribute publications to best advantage. Additional copies will be furnished on request so far as possible.]
